Summary

Research data analyst with clinical training (BDS) and a master's in health informatics. Manage, clean, validate and analyze research and clinical data, and automate the slow manual steps along the way, cutting turnaround from months to weeks. Known for making data accurate, easy to use and simple for teams to work with on their own.

Skills

- **Data management** Data cleaning, validation and QC, tracking sheets, source data verification, audit logs, SOPs
- **Analysis** Statistical modeling (general linear models, permutation testing, t-tests), data visualization
- **Programming** Python (pandas, NumPy), R, Bash, Git/GitHub, HPC/SLURM, DICOM/NIfTI, SQL (coursework)
- **Clinical research** REDCap, OnCore (CTMS), Cerner EHR, Good Clinical Practice, HIPAA, IRB-approved protocols
- **Reporting** Power BI, Tableau, advanced Excel

Experience

Research Data Analyst (joined as intern, promoted Jun 2025) Sep 2024 - Present
Stark Neurosciences Research Institute, Indiana University School of Medicine Indianapolis, IN

- Manage data end to end for multiple NIH-funded studies, from raw intake to validated datasets and results summaries.
- Automated slow manual measurement work, cutting turnaround from 2-3 months to about 2 weeks and from a week to under a day; now the lab's standard, used on 1,000+ images across 5 studies.
- Organized 3 longitudinal studies (150-180 scans each) around spreadsheet tracking sheets as the single source of truth, with QC audits that catch missing, duplicate or mislabeled records before analysis.
- Run statistical analyses (general linear models, permutation testing) and present results in reports and slides.
- Wrote SOPs and trained 3 colleagues to run the workflows independently, removing reliance on one analyst.

Communications Coordinator (nominated, Graduate Student Employee of the Year 2025) Aug 2024 - May 2025
Graduate Medical Education, Indiana University School of Medicine Indianapolis, IN

- Built Power BI dashboards for 30+ residency and fellowship programs, replacing large spreadsheets and MedHub exports with one view of recruitment and trainee feedback that showed leadership which programs needed changes.

Clinical Data Coordinator Dec 2023 - Mar 2024
Division of Gastroenterology & Hepatology, Indiana University School of Medicine Indianapolis, IN

- Abstracted and verified Cerner EHR data into REDCap and OnCore for about 200 participants in 2 NIH-funded studies.
- Resolved source data discrepancies with investigators, keeping records audit-ready under GCP and HIPAA.

Graduate Research Assistant Aug 2023 - May 2025
Luddy School of Informatics, Computing, and Engineering, Indiana University Indianapolis, IN

- Cleaned and analyzed survey data in R and built Tableau visualizations for a health informatics workforce study.

General Dentist Dec 2021 - May 2023
Sri Snigdha Super Speciality Dental Clinic and Implant Centre Hyderabad, India

- Assessed and treated patients and maintained accurate clinical records and treatment plans.

Projects

Automated Image Analysis Pipeline Aug 2026
Project Site: *psushruthi.github.io/amyloid-beta-microglia-website*

- Replaced about a week of manual image measurement, which varied from person to person, with a batch pipeline that processes about 300 images in 2-3 hours using the same settings every time.
- Built in Fiji/ImageJ with Python; exports results and settings to CSV with an HTML summary and outline images for QC.
- Documented on GitHub and a public site (HTML, CSS, JavaScript) explaining the method for non-technical readers.

Education

Master of Science in Health Informatics, Indiana University Indianapolis · GPA 3.7 Aug 2023 - May 2025
Bachelor of Dental Surgery (BDS), KLE University, Belagavi, India · GPA 3.7 Sep 2017 - Dec 2022

Certifications & Publication

- CITI Good Clinical Practice · CITI Biomedical Research · HIPAA Privacy & Security · AMIA member
- Co-author, survey study of oral health practices in South India, *J Indian Assoc Public Health Dent*, 2025 · View Publication
